

Floor Plan

1. Sketch the floor plan of your home.
2. Identify two exit routes on each floor or from each room.
3. Identify the safe spots in each room (under sturdy tables, desks, or against inside walls).
4. Identify the danger spots in each room (windows, mirrors, hanging objects, fireplaces, tall furniture).
5. Identify the location of interior utility shut off valves, flashlights (and batteries), first aid kit, fire extinguishers, emergency food & water supplies.
